

Team Vivian
SheInnovates 2024

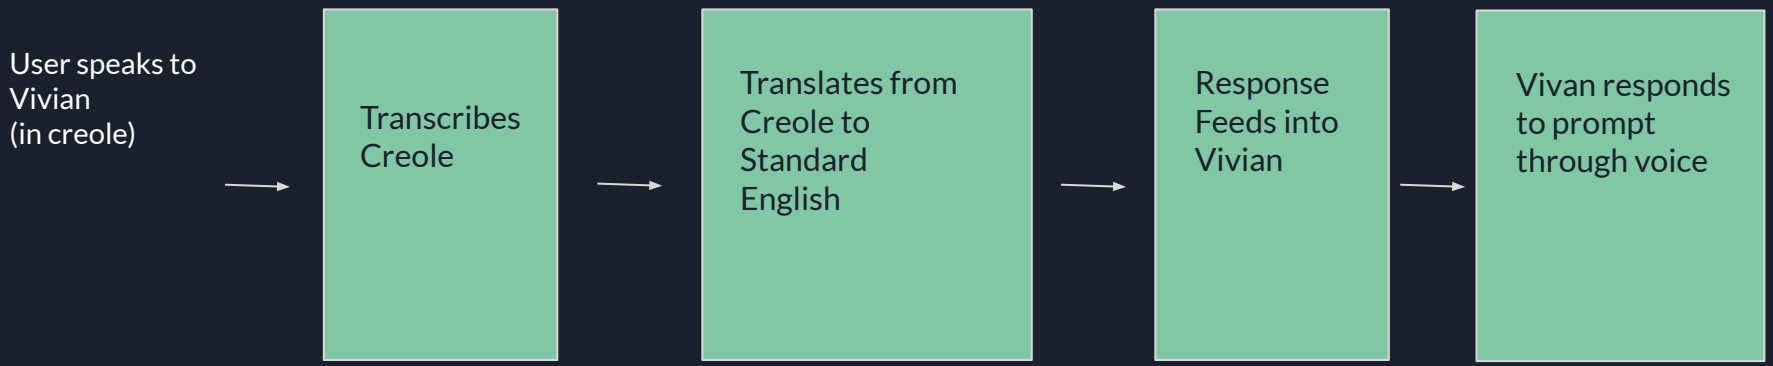

Kayla McFarlane (CMU), Julie Lawler (Pitt),
Brandon Yasin (Pitt)

Vivian is a Caribbean Voice Assistant

- **GAP:** Many speech-to-text systems fail to recognize english-based languages of the Caribbean, making technology largely inaccessible for this demographic.

- **IDEA:** Create a more meaningful and positive user experience for Caribbeans engaging with technology

There are multiple parts to Vivian

How Vivian Works

- Vivian uses technology from python libraries/APIs to interact with users
    - OpenAI/ WhisperAI, ElevenLabs, Pygame, etc.

- Vivian was intended to engage with users in a Caribbean english-based language but the data remains insufficient to train an AI model.

- Users click the start button and a Python script is initialized to begin the speech-to-text engagement.
